
EXPERIENCE

Software Engineer **Nearby Creative LLC.** **04/2020 – 03/2021**

- Refactored frontend client in React to accommodate reusability and reduce clutter in code resulting in the development of company coding convention and best practice documentation
- Implemented type checking and in-line documentation using features of Typescript and JSDoc to enhance user/internal experience, increasing client connection scores by 40% and decreasing slow server request issues
- Designed validation form that flagged potential user/spam bot activity using time constraints, creating a safeguard for server performance and identifying potential malicious activity

Software Engineer II **Nearby Creative LLC.** **03/2021 – 01/2022**

- Promoted to Lead Software Engineer after 1 year, supervised on-boarding procedures for newly hired engineer and revamped documentation to enhance & streamline the overall process
- Enhanced internal platform infrastructure by implementing responsive web design features and parallax animations, creating a more engaging and personalized company experience

Software Engineer, Contractor **LiftFund** **06/2021 – 12/2021**

- Successfully navigated, documented, and enhanced the system architecture to perform the client needs after spending 1 month learning AWS software with the only other existing engineer on the team who was leaving for another role (Included Amazon S3, EC2, API Gateway, EBS and Lambda functions written in Python)
- **Highlight:** Discovered active duplicate server that was costing the client over \$1000 a month and successfully removed it, saving the company \$6000

Store Manager **Starbucks Coffee Co.** **01/2015 – 02/2019**

Empire State Building

- Planned, identified, communicated and delegated appropriate responsibilities and practices for a team of over 85 store partners, ensuring smooth flow of operations and organizational capability.
- Managed with integrity, honesty and knowledge to promote the culture, values and mission of Starbucks increasing partner satisfaction by 18% and productivity by 6%
- Utilized and mastered internal informational tools and financial reports to identify trends, issues, or opportunities to drive sales. **Highlight:** Awarded for youngest SM to achieve \$3,000,000 in sales for one fiscal year

EDUCATION

Newark, NJ **New Jersey Institute of Technology** **2020 – 2022**

- B.S. in Computer Science – May 2022(Ongoing)

PROJECTS

- **Portfolio** ([Website](#)) Full-stack application that uses a variety of animation libraries, parallax designs, and responsive web architecture to provide a unique and engaging user experience and highlight my latest projects including my art gallery and science & technology live stream!

Languages and Technologies

- C++; JavaScript; Java; SQL; TypeScript; Python(low-level);
